Claims 1-4 (Canceled).

<u>Claim 5</u> (Currently Amended). A stringed musical instrument, comprising:

a body that generally forms a waist, upper bout and lower bout regions, and comprises a bottom deck, a top deck with a bridge, and a side joining the top and bottom decks;

a neck;

a plurality of strings positioned lengthwise about the neck; and

a computer unit held by the body in a position that is viewable to a user of said instrument, the computer unit comprising a display held by the side of the upper bout region in a position where the display is viewable by the user when playing the instrument and that provides the user of the instrument with song-related data to assist the user in playing the instrument, and comprising an operating system that allows a user to create, store, recall, and manage music-related and non-music-related data.

<u>Claim 6</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the body, neck, and strings are components of a guitar.

<u>Claim 7</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the body, neck, and strings are components of a bass guitar, banjo, mandoline, violin, or pedal-steel guitar.

<u>Claim 8</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the computer unit is integrated into the body of the instrument.

<u>Claim 9</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the computer comprises menu-driven software.

<u>Claim 10</u> (Previously Presented). The stringed musical instrument of claim 9, wherein the menu options can be selected by touching an appropriate position of the display.

<u>Claim 11</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the computer comprises a digital video disc player.

<u>Claim 12</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the computer comprises software that stores and visually displays contact names and addresses.

<u>Claim 13</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the computer comprises an USB port for downloading information from another computer.

<u>Claim 14</u> (Previously Presented). The stringed musical instrument of claim 5, wherein the songrelated data include complete song tablature.

<u>Claim 15</u> (New). A stringed musical instrument, comprising:

a body that generally forms a waist, upper bout and lower bout regions, and comprises a bottom deck, a top deck with a bridge, and a side joining the top and bottom decks;

a neck;

a plurality of strings positioned lengthwise about the neck; and

a computer unit held by the body, the computer unit comprising menu-driven software and a display held by the side of the upper bout region in a position where the display is viewable by the user when playing the instrument and that provides the user of the instrument with

song-related data to assist the user in playing the instrument, and comprising an operating system that allows a user to create, store, recall, and manage music-related and non-music-related data;

visual display capability for contact names and addresses; and

visual display of menu options that can be selected by touching an appropriate position of the display.
